Agriculture

Investing in agriculture means putting your money behind food and crop production, processing, and distribution. As the world needs to feed a growing population and with less land, interest in agriculture production as an investment has grown right along with the world population

Hot Deals From Real Estate

Real estate investment involves the purchase, ownership, management, rental and/or sale of real estate for profit. Improvement of realty property as part of a real estate investment strategy is generally considered to be a sub-specialty of real estate investing called real estate development.

Real estate is an asset form with limited liquidity relative to other investments (such as stocks or bonds that openly trade on financial markets). It is also capital intensive (although capital may be gained through mortgage leverage) and is highly cash flow dependent. If these factors are not well understood and managed by the investor, real estate becomes a risky investment.

Cryptocurrency

Sagro Limited now offers all traders the opportunity to trade a wide range of the top ranked digital coins 24/7*. Today cryptocurrencies have become known to most people as a conventional and popular investment

option. The main purpose of this new technology is to allow people to buy, trade, and invest without the need for banks or any other financial institution.

Cryptocurrencies are highly volatile and can be profitable to any trader's portfolio. Cryptocurrencies are not physical coins they are electronic, a digital asset that remains as data. The technology behind the cryptocurrency controls a large part of its value which holds new technology on the secure way to identify and transfer money. The first digital coin introduced was the Bitcoin and today it remains as the standard that all other coins compare themselves to. Following in its steps came Litecoin, so to date they stand as the top 2 highly valued

coins on the market. There are several other coins also reaching a high-level market share such as Bitcoin and Bitcoin Cash, Dash, Ripple, Ethereum and Ethereum Classic.

We believe that the full benefits and potential of cannabis as a medical therapy are within our reach only through supply chain transparency, an engaged and active network of cannabis users, and data that is consistently available and verifiable for medical surveys and for developing and establishing therapies and life-prolonging solutions and treatments on blockchain technology. Our vision is one in which cannabis medical research gets the support it needs and deserves.

Gold Investment

Commonly seen as a great store of wealth, this precious metal is also known as a reliable safe-haven asset. With a rich history amongst almost all global cultures, gold remains a highly popular investment. Although it has multiple uses, its primary function is typically to hedge against inflation in an often volatile futures market, as well as to diversify existing Precious Metals Investment Retirement Accounts. Gold has been one of the most valuable precious metals throughout human history, used by elites as a symbol of wealth for centuries due to its rarity and its ability to hold its worth for a long time.

Historically, it has been the most common way to pass on one's wealth as an inheritance from one generation to the next. Gold is considered a worthy investment, with coins and bars available for purchase in various sizes, ranging from one gram to a whopping 400 ounces. Being the most reliable investment commodity available, gold has proven to be a perfect way to diversify your investment portfolio and an excellent safeguard against volatile currency.

Retirement Planning

Saving for retirement can be a daunting task, but with a sound strategy, it's well within reach. Sagro Limited is here to bring clarity to retirement planning and set you on your path to success. Here you'll better understand your options and find the right investment.

If you had the chance to double—or even quadruple—your retirement savings, you'd probably jump at that opportunity, right? Well, there's one simple change you can make today that's sure to boost your retirement savings.

Quadruple Your Retirement Savings? Really?

Sagro Limited study of worldwide retirement saving habits discovered that people with some kind of retirement plan have more than three times as much in their nest egg than those with no plan at all. And savers who take it one step further by working with an investing advisor to put their plan to paper? Their average nest egg is a whopping 445% bigger than non-planners. That's a big deal! Now, did you catch that? By working with an advisor and by having a plan in place, you can supercharge your retirement savings.

Medical Cannabis

For many years we have been working conscientiously and with the most diverse technologies and means. We have constantly successfully completed our projects.

We believe that the full benefits and potential of cannabis as a medical therapy are within our reach only through supply chain transparency, an engaged and active network of cannabis users, and data that is consistently available and verifiable for medical surveys and for developing and establishing therapies and life-prolonging solutions and treatments on blockchain technology. Our vision is one in which cannabis medical research gets the support it needs and deserves.

Cannabis Goals.

Foster a social community online in which each member can participate freely and offer the breadth of their knowledge and experience

Understand the regulatory, legal, and technological needs and challenges of the medical cannabis industry

Continually advance the medical cannabis blockchain data ecosystem to medical studies

Establish strong vendor and partner relationships with technology firms, doctors, scientists, universities, and governments to ensure data integrity and value

Oil And Gas

Oil trading with Sagro Limited

Surprising as it might be, anyone can invest in the oil market to make a profit. Indeed, the development of online trading platforms has allowed individuals to use their savings to speculate on rising or falling oil prices. To this end, simply choose your method of trading between the Sagro Limited's offered by Forex brokers, which are specifically designed for beginners. Invest-oil.co.uk makes a point to explain how these two trading tools work and how best to use them for profit.

Benefits of investing in oil:

Traded oil has many advantages compared to other popular assets such as for example stocks. Speculating with oil only requires some basic technical and fundamental analysis of the market. Terms seem complicated? Not to worry! The website invest-oil.co.uk was specifically created to assist investors in understanding the rules of investing in black gold and thereby enable them to easily gain access to this opportunity. You will have the upper hand to quickly make profits and earn money simply through oil price changes.

Speculating online:

Speculate online on the price of black gold on the rise or on the fall, you should rely on the advice of this site devoted to black gold trading.

Indeed, you will find explanations of the different factors driving prices up or down, as well as news on this explosive market. This site covers all the basics of this market and speculation techniques, explained in a simple and illustrated manner for better understanding. The only thing left to do will be to implement your strategy.

As an individual, the best method available for trading in oil is through the use of an online trading platform . You will find this service widely available among brokers that enable you, through the use of Sagro Limited's, to speculate on oil and other assets such as shares and stock market indices or other commodities such as gold. The operation of Sagro Limited could not be simpler and more convenient for the use of anyone that wishes to invest in the oil market without having any previous experience in trading. It simply requires that you take a position on the rise or the fall of the oil price at a given moment and close your position when the foreseen profits are reached or when you wish to cut your losses.

Profit from the fall in the price to invest in oil over the long term:

You have no doubt noticed that, since 2014, the oil prices have fallen greatly. After approaching \$100 per barrel they finally lost nearly 50% of their value. But, as with all financial markets, the oil market is governed by cycles alternating between rising and falling trends. Therefore, the analysts predict a new rising trend shortly that may enable investors to

achieve substantial profits. It is therefore judicious to closely monitor the emergence of this new trend to take position over the long term, or take position now using a short term cover.

How to cover a long term investment in oil?

As we have just seen, the oil sector analysts expect a new rise in the price per barrel of oil in the coming months or years. It may therefore be beneficial to invest in oil over the long term. But, while waiting for this trend to begin, the price per barrel may still experience a further fall. To cover any eventual losses during this period, you may opt for a strategy that aims to take short parallel positions to sell with a strong leverage effect of which the profits enable you to keep your long position open until the rising objective is reached.

The indicators to take into account for oil trading:

To trade in oil online using Sagro Limited is strongly recommended to use data

from both technical and fundamental analysis. Your technical analysis can be completed using comprehensive customised charts that are available through your broker on the trading platform upon which you can display different indicators. Concerning fundamental analysis, this consists of monitoring and analysing the factors and exterior events that may influence the oil price. These of course include data on the supply and demand of oil throughout the world as well as other indicators. For example, the American oil stocks are carefully monitored by traders. You will find them each week in the economic calendar as they are published every Wednesday. These stocks give you concrete information on the demand and consumer levels of oil. Large stocks have a tendency to lower the price of oil and vice versa. Finally, the U.S. Dollar rate can also influence the oil price as an advantageous exchange rate can encourage buyers to invest in the commodity which is quoted in this currency.

Financial Planning

A financial plan is a comprehensive evaluation of an investor's current and future financial state by using currently known variables to predict future cash flows, asset values and withdrawal plans. Most individuals work in conjunction with their preferred financial planner and use current net worth, tax liabilities, asset allocation, and future retirement and estate plans in developing financial plans.

Loans and Grants

Getting a loan doesn't have to be intimidating, with the right lender it can be a simple process. You only need a lender committed to taking the mystery out of the mortgage loan process! At Sagro Limited, we understand! Our investors want simple facts, honest answers and competitive products. DGS automatically offers loan services to investors with over \$50,000 investment either in our normal Sagro Limited Services packages or the NFP plans.

Investors over \$50,000 are entitled to loans of \$200,000-1million dollars yearly with 5% paid monthly, or the investor could wish to compound the interest till the time limit, provided all required information and identity of the investor are duly confirmed by Sagro Limited loan board. Every investor above \$50,000 is provided with a personal account manager and the investor has a direct communication with the manager in order to see that our loan offers are secured.

Stock or Share

A stock or share (also known as a company's "equity") is a financial instrument that represents ownership in a company or corporation and represents a proportionate claim on its assets (what it owns) and earnings (what it generates in profits). Stock ownership implies that the shareholder owns a slice of the company equal to the number of shares

held as a proportion of the company's total outstanding shares. For instance, an individual or entity that owns 100,000 shares of a company with one million outstanding shares would have a 10% ownership stake in it. Most companies have outstanding shares that run into the millions or billions.

Tokenization

Sagro Limited help various platform to advertise, Exchange and Participate in their Various Tokens networks and NTF projects which is created and secured on Mainnet and testnet automatically verified on BSCSCAN, BLOCKCHAIN AND smart chains.

All our network contracts are white label with 100% your ownership and transparency.

Sagro Limited supports Token project and gives an amazing profit on the following : NFT

Cryptographically

Stalking

Gaming

Types of Tokens

Utility tokens:

They are tokens that only have value in the use of a system.

Security tokens:

They are tokens that equate to an ownership stake in a company or DAO. When you buy a security token you're buying it with the intention that the value will be derived on the value the company or its future profits.

Commodity tokens:

They are tokens backed by a standard assets that already have an independent value such as gold, oil or a sovereign currency.

A solid pool of liquidity for the company's operations is provided by attracting private investments.
